Failure to comply with the feed water pretreatment recommendations will affect the life and performance of key components and may invalidate the warranty.

Feedwater requirements are specified for systems fitted with a Protek pretreatment cartridge.

If feedwater purity is variable or values are outside any of the above ranges, additional pretreatment is recommended to be installed in the feedwater supply to the BIOPURE system.

If in doubt seek advice from Technical Support at ELGA LabWater.

* Deionization cartridge life may vary with feedwaters >1400 µS/cm
